

Finite control trace: stable input age at 57 accepted events

Observed wrapper CSV: 1,926 clock edges; all accepted captures satisfy context 15T / fine code 1T

-15T: quiet / P0
context ID 3
edge 51

-1T: P14 fine code
edge 65

0T: P15 wire launch / shadow stage-A
edge 66, ID 3

Observed digital control boundaries only. Stage-A is a shadow monitor; the real weight/recon datapath is absent.

No analog waveform/settling, complete re-enable/config-clear coverage, full-state MCP proof or STA signoff.
